

COLOR TUBES

General Description:

Take a whole new view on color.

A new approach to LED technology, the state of the art Color Tubes are the ideal alternative to neon tubing. The linear light sources provide a direct view of continuous columns of color.

The Color Tubes are available in 19.5", 39", 59", and 79" sizes and can be used for indoor and outdoor applications. Easily programmable using a WDM DMX Controller, the Color Tubes can produce limitless views of color patterns and custom messages.

The Color Tubes can stand alone for dynamic border lighting or used in a set to create a wall of seamless color.

No matter how you use them, one thing is certain. You'll attract curious admirers ...like drawing moths to a colored flame.

Easy-to-use high output, long life LED color tube with 144 LEDs (48 red, 48 green, 48 blue)

Specification:

Input: C120V, AC240V

Max.Power consumption: 16.8W per meter
